Office Action Summary	Application No. 10/812,819	Applicant(s) YEH ET AL.	
	Examiner Charles R Kasenge	Art Unit 2125	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lily et al. U.S. Patent 5,787,000 in view of Fischer U.S. Patent 6,675,055. Lily discloses a production scheduling system for scheduling parts to be produced, the production scheduling system comprising: a basic data maintaining module for adding, modifying, inquiring of and deleting basic data (col. 7, lines 8-22), the basic data including machine resource data (col. 4, lines 1-7), product data and part data (col. 3, lines 55-61); and a simulation analysis module for dynamically analyzing supply and demand, and generating scheduling results according to basic data provided by the basic data maintaining module (col. 8, lines 33-67). Lily does not disclose a production system that is specifically for mold production. However, Fischer discloses using a scheduling production system for mold production (col. 15, lines 53-67).

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to use Lily's production scheduling system for mold production. One of ordinary skill in the art would have been motivated to do this since Lily discloses the invention generally applying to scheduling the manufacturing of products (col. 1, lines 5-8).

Allowable Subject Matter

3. Claims 8-15 are allowed.
4. Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
